# Still hungry ?

1 It's starting to look a bit more like a game now.
Just a few more steps to go.

First of all – we need more bananas. Right click on the banana icon in the bottom right and select 'duplicate'.   If you are working on an Apple Mac, hold down CTRL and click.

I have created three Bananas here (I did duplicate twice)

2 I think it might be time to save again. Just click on the disk icon again.

3 and now time for a test. Move the cat round with the arrow keys on the keyboard. Move the mouse round the screen to show the cat where to aim and press the mouse button to make him throw his boomerang.

Good luck with the 'banana hunting'.

How many can you catch ?

How many can you hit in one throw. I just did 4 in one throw while I was testing this !

I feel we are still missing something to make this into a super Ninja powered game.

4 Let's add a background to make it look cool.

Click on the stage icon. That's the white square down near the icons in the bottom right hand corner of the screen.

At the top of the middle area you can now click on 'backgrounds'.

And then 'Import'

I picked 'desert' from the outdoor area :
