# It's all coming back to me now...

1 Add a new sprite. This time use the first icon with the little paint brush in front of it so we can use our drawing skills.

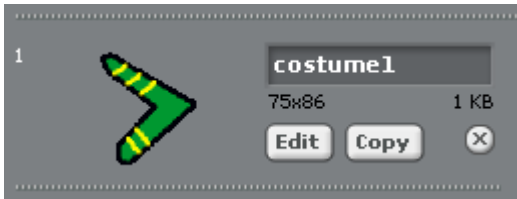

2 Using the pens, the lines, the fills and the colours draw a boomerang.

Something like this (although I'm sure your one will be better than mine) :

If you are happy with your master piece, click OK. If you make a mistake, you can always click 'Undo' – or if it goes really bad click 'cancel' and then do it again.

3 Click on 'copy' :

Do it again and again until you end up with 6 costumes.

4 Click on the Edit button next to Costume '2'. Click on this rotate button 2 times :

Click on OK

5 repeat for each costume going downwards – but each time, click two more times.
For Costume 3 – click 4 times.
For Costume 4 – click 6 times.
For Costume 5 – 8 times,
and for Costume 6 – click 10 times.
