# Make it look even better

1 Let's finish off the look of the game.

Click on the white square at the bottom right called 'stage'. This is the white screen behind the game.

Click on backgrounds and import.

Go into Nature and pick a back drop. I picked 'desert'

You can also see my highest score '12'. Can you beat that ?

We are getting quite close to a funky game.

It's now just missing one thing. YOUR changes.

This is now your game so add on your own bits to make it perfect.

Some ideas -

*   Better sound effects

*   The drops move at different speeds

*   more things to collect

*   The cat can move faster as the levels go up

*   Changing backgrounds

*   An 'end game' or a way of winning or losing

and most importantly – your idea…..
