# Even more rain ? Sounds fishy to me.

1 Add in some more rain. This is pretty simple to do.

Right click on the raindrop

and click duplicate
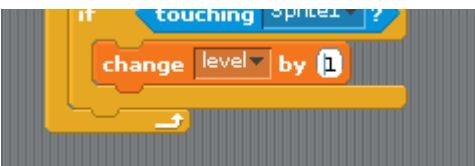

I have done this four times so I get five raindrops.

2 If the cat is avoiding the rain drops, we should also give the cat something to try to get.
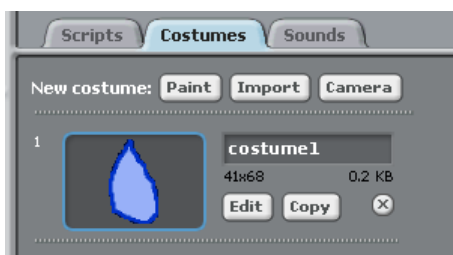

Click on duplicate one more time.

Click on this rain drop so it is highlighted.

We need to make a few small changes to this one.

Right at the bottom – where it says 'change level by -1', change the number so it just says '1' :

3 Let's also make it look different. Click on 'costumes' up at the top.

Click on 'import' and then go into the Animals folder

Select one of the fish :

and click OK

You may need to make it a bit smaller using the shrink icon.

Try to get it about the same size as a rain drop.

3 Time to save... and then to test. Press the green flag when you are ready...
